

Brustolon, Giovanni BattistaDont di Zoldo *circa* 1716–1718 — 1796 Venice

Prospectuum aedium, viarumque insigniorum urbis venetiarum nautico certamine, ac nudinis adiectis. Tomus primus tabulas XII complectens, quas Antonius Canale coloribus expressit – Joannes Baptista Brustolon aere incidit. Serenissimo Principi D.D. Marco Foscareno Egregio, emerito, sapientissimo Augustae Republicae Duci D.D.D. Anno AE C. 1763 ab V.C. 1341.

Venice, Lodovico Furlanetto, 1763

OBLONG FOLIO (535 × 730 mm), (21)ff., comprising etched and engraved frontispiece (lettering transcribed above) and twenty etched and engraved views (each *circa* 325 × 460 mm) by Brustolon after paintings or drawings by Canaletto, Michele Marieschi, Giambattista and Giuseppe Moretti, very fine, fresh impressions in FIRST STATE (of four), all prints retaining broad margins (sheet dimensions *circa* 506/510 × 720 mm, some deckle edges preserved).

PAPER large watermark of a bouquet of flowers above initials FV (signifying the mill of the Fratelli Vezzoli, Toscolano; seen in frontispiece and ‘Nocte festum Sanctae Marthae’); smaller mark with initials FV (height 32 mm; discernable in six prints).¹ Watermark in binder’s endpapers: fleur-de-lys (height 60 mm).

Included in the album (bound as the penultimate plate) is an impression of ‘Serenissimus Venetiarum Dux, recens renuntiatus, a Seniori ex XLI. electoribus in Ducali Basilica populo conspiciendus proponitur’ (matrice 450 × 570 mm), an etching by Brustolon after Canaletto, from the series of ‘Feste dogali’ (plate 1 of 12), a good impression in the second state (of four), on paper with large watermark of a (star?) on a shield (height 230 mm) and countermark ~ OLANDA ~.

PROVENANCE old octagonal library shelf label with gold border (20 × 22 mm), within *E : 6* added by pen (positioned in bottom outside corner of lower pastedown) — anonymously consigned to Sotheby’s, ‘Old Master, Modern & Contemporary prints’, London, 3 October 2006, lot 14

CONDITION short tears in margins of frontispiece, weak hanging folds (except ‘Nocturna populi exultatio’, where fold stronger), slight surface dirt along edges of sheet (and stains on verso of ‘Nocturna populi exultatio’), vertical handling creases on some plates, however generally in excellent state of preservation.

Abbreviated references are expanded in BIBLIOGRAPHY.

¹ ‘S. Georgii Majoris Ecclesiae Prospectus’, ‘Prospectus Plateae Divi Marci’, ‘Dextrorsum Theresiani sinistrorsum S. Simeon Parvus atq; Fullonium’, ‘Magni Armamentarij’, ‘Vespera Diei Nativitatis Domini’.

BINDING contemporary Italian half-vellum; sides covered by rough brown paper, the vellum back decorated by four repetitions of a gilt rose tool, and lettered in ink *Canaletto Vedute*.

ONE OF THE FINEST of Venetian topographical print suites, equal in stature to the publications of Carlevarijs, Canaletto-Visentini, and Marieschi, however of greater rarity, especially as here in first edition (of four) with all prints in first state and in fine state of preservation.

Ten of its twenty *vedute* depend from paintings of Canaletto drawn and engraved by Antonio Visentini (published 1735 and 1742; reissued 1751, 1754), adapted to a larger size by Brustolon, who extended the views and enriched them with new objects and figures (see **Fig. 1**).² Another four *vedute* are precise copies of prints by Michele Marieschi (published 1741–1742; reissued 1751, 1757), slightly reduced from their models.³ The remaining six of Brustolon’s *vedute* are more original: four etchings are derived from recent paintings and drawings by Canaletto (executed 1756–1763; see **Fig. 2**) and the other two document paintings or drawings by Giambattista and Giuseppe Moretti. Throughout the suite, but particularly in etchings of this last group, depicting popular festivals seen by moonlight, Brustolon displays his special gift for rendering ‘la trasparenza dei cieli del Canaletto, e la luminosa brillantezza delle architetture’,⁴ which has earned for him a position ‘tra i più dotati e versatili incisori del suo tempo’.⁵

Giovanni Battista Brustolon

According to recently discovered documents, Brustolon was born in Dont di Zoldo (Val Zoldana, province of Belluno) *circa* 1716–1718 (not in Venice in 1712, as generally

² Brustolon adds almost 2% on each side, more sky, and about 10% to the bottom of the original views (his etched views measure 280/283 × 430/434 mm on matrices 434/445 × 447/465 mm, whereas the views in Visentini’s *Prospectus Magni Canalis Venetiarum* measure 251/254 × 420/424 mm on matrices 270/277 × 426/436 mm).

³ The etched views in Marieschi’s *Magnificentiores selectioresque urbis venetiarum prospectus* measure 288/308 × 441/464 mm on matrices 300/317 × 445/470 mm.

⁴ Terisio Pignatti, ‘Canaletto e la incisione di *Vedute* a Venezia nel Settecento’ in *Bollettino dei Musei Civici Veneziani* 13 (no. 2, 1968), p.8. Brustolon accomplished ‘the difficult task of reproducing the different tonalities of the master’s wash effects’ with ‘variations of line and the use of crosshatching, in addition to multiple acid bitings on controlled parts of the copperplate’ (Ruth Bromberg, in *Glory of Venice: art in the eighteenth century*, catalogue of an exhibition held at the Royal Academy of Arts, London, edited by Jane Martineau & Andrew Robison, New Haven 1994, p.433).

⁵ Mari Pietrogiovanna, in PELLEGRINI p.62.

stated), and became a resident of Venice in 1733.⁶ He most probably is the ‘Burstaloni’ from whom the Swedish diplomat Carl Gustav Tessin (advised by the local connoisseur Antonio Maria Zanetti) purchased in May 1736 ‘Deux têtes’, reporting (in a letter to Carl Hårleman, dated 16 June 1736) ‘Burstaloni peint al fresque et à l’huile, bien et bon marché; mais sa composition est peu de chose, et ne sauroit passer une moyenne toile’.⁷

From his arrival in Venice until about 1742, Brustolon is documented in the employment of the printers Guglielmo Zerletti and Antonio Girardi in the parish of SS. Ermagora e Fortunato (San Marcuola), working as a designer or engraver of book illustrations. The earliest of his signed illustrations appear in books issued in 1745 by the publisher Francesco Pitteri.⁸ By the mid-1750s, Brustolon was working for the two most renowned publishers in Venice, Antonio Zatta and Giambattista Pasquali; in the following decades, he illustrated books published by Tommaso Bettinelli, Giuseppe Bortoli, Giacomo Caraboli and Domenico Pompeati, among others; and in 1780 he embarked on an independent venture – a series of large views of Rome, etched and published at his own expense.⁹ Through-

⁶ Federico Montecuccoli degli Erri, ‘Novità biografiche sull’incisore Giambattista Brustolon, bellunese’ in *Ateneo Veneto*, new series, 35 (1997), pp.157–166; another digestion of these documents is Cristina Romanenghi, ‘Alcune novità su Giambattista Brustolon’ in *Grafica d’arte* 8 (no. 30, April–June 1997), pp.10–11. For the traditional account, see BORRONI pp.726–728.

⁷ Letter printed by Osvald Sirén, *Dessins et tableaux de la Renaissance italienne dans les collections de Suède* (Stockholm 1902), pp.107–109; see also, Per Bjurström, ‘A Canaletto that Tessin acquired in Venice in 1737’ in *Nationalmuseum Bulletin Stockholm* 4 (1980), pp.111–115, identifying several of the pictures mentioned in this letter, but not the ‘Deux têtes par Burstaloni’.

⁸ Portrait and vignettes in Nicolò Costantini, *Memorie storiche, critiche, morali, concernenti la vita del beato Giordano Forzate* (Tullia Gasparrini Leporace, *Il libro illustrato nel Settecento a Venezia*, catalogue of an exhibition in the Biblioteca nazionale Marciana, Venice 1955, no.27). Pitteri’s engraved device of Fortune with personifications of the Arts and Sciences, signed by Brustolon, came into use at the same time (in Annibale Antonini, *Dictionnaire italien, latin, et français*, 1745).

Brustolon’s earliest print is mistakenly identified by ALPAGO NOVELLO pp.569–570 as a portrait of Francesco Beretta, in Beretta’s *Principj di filosofia cristiana* (Padua, Giovanni Antonio & Gaetano Volpi for Giuseppe Comino, 1730). No copy of that book containing a print by Brustolon is known to the writer; however, a portrait of Beretta by Brustolon (matrice 210 × 134 mm, legends *Franciscus Comes Beretta* | *Patritius Utinensis* | *Piet. Ant. Novelli del.* | *Gio. Batta Brustolon inc*) illustrates Beretta’s *Dello scisma de’ tre capitoli particolarmente in cio che appartiene alla storia del Friuli opera postuma* (Venice, Tommaso Bettinelli, 1770). The copy of Beretta’s *Principj* seen by Alpago Novello may have been extra-illustrated by this later print.

⁹ On 29 September 1780, Brustolon applied for a privilege to publish twenty-two large views of Rome after drawings by Canaletto in an album which he had obtained from the artist’s heirs (the drawings, mostly now in the British Museum, are autograph works, made during Canaletto’s visit to Rome in 1719–1720; see KOWALCZYK pp.20, 26–37, nos. 2–13). Judging by their present rarity, the prints were unsaleable (SUCCI 1983 pp.82–83, note 5).

out this time Brustolon also worked intensively for the printmaker and print publisher Lodovico Furlanetto.

Lodovico Furlanetto

Lodovico Furlanetto was already well-established ‘sul ponte dei Baretteri’ by 1739, in which year he obtained a privilege for a reissue of Lodovico Ughi’s thirteen-sheet plan of Venice, having acquired the matrices after the death of their original publisher Giuseppe Baroni.¹⁰ In his petition for this privilege, Furlanetto describes himself as ‘incisor d’istorie e santi istorati’,¹¹ and the making and selling of so-called ‘popular’ prints probably always was his primary business.¹² Two stocklists are known: a ‘Catalogo delle Stampe di Lodovico Furlanetto’ of *circa* 1779,¹³ and a ‘Catalogue des ouvrages gravées au Burin, qui se vendent chez Louis Furlanetto Marchand Imager, Rue Mercerie sur le Pont des Berrettas a Venise, Avec Privilege du Senat’ of *circa* 1778.¹⁴ Most of the publications advertised were struck from old matrices obtained from a variety of sources: six reproductive prints, after Charles Le Brun,¹⁵ Antonio Balestra,¹⁶ Pietro Liberi,¹⁷ Veronese,¹⁸ and Tintoretto;¹⁹

¹⁰ GALLO p.10; SCHULZ pp.82–83 no. 116 (reproducing Baroni’s edition).

¹¹ GALLO p.60 (Documento VI).

¹² Representative of Furlanetto’s inventory are an etching (matrice 120 × 76 mm) by Cristoforo dall’Acqua, legends *S. Bartholomaeus Ap. Armeniae* | *C. Dall’Acqua fec.* | *Ven.a: Lud.co Ful.to sul Ponte de’ Barretteri*; and an etching and engraving (matrice 218 × 147 mm) by Giacomo Leonardis after Domenico Maggiotto, legends *B. Hieronymus Aemilianus* | *congregationis clericorum regu- larium de somascha fundator* | *Domi. Majotto pinx.* | *Jac. Leonardis sculp. Ven.* | *In Venezia: per Lodovico Furlanetto sopra il Ponte de Baretteri con privilegio* (impressions reproduced on website of Gabinetto delle Stampe ‘Angelo Davoli’, Biblioteca Panizzi, Reggio Emilia, Inv.5278, 8261).

¹³ This stocklist accompanied Furlanetto’s application, in 1779, for a blanket privilege for sixteen publications, and is known only through a contemporary transcription; see GALLO pp.39–41; SUCCI 1986 pp.382–384, docs.42–47.

¹⁴ Copy reproduced by MARINI p.101 fig.49, where dated *circa* 1775; another copy (Archivio di Stato di Venezia) is cited by SUCCI 1986 p.152, where dated *circa* 1778.

¹⁵ *Il Crocefisso dipinto da Carlo Lebrun* (Catalogo 1779).

¹⁶ *Il S. Francesco del Balestra* (Catalogo 1779).

¹⁷ *La Battaglia de Pagni dei K.r Pietro Liberi*, in 3 Fogli Imp.li (Catalogo 1779): perhaps from the matrice of Domenico Rosetti (Charles Le Blanc, *Manuel de l’amateur d’estampes*, Paris 1854, III, p.363, no. 18).

¹⁸ *La Cena di Paolo Veronese in S. Giorgio Maggiore* (Catalogo 1779), ... *en deux Feuilles* (Catalogue 1778); also *L’autre Cene du même Paul Veronais en trois Feuilles, qui orne le Refectoire du Couvent S.S. Jean & Paul de Venise* (Catalogue 1778).

¹⁹ *Il Paradiso del Tintoretto nella Sala del Gran Consiglio* (Catalogo 1779), ... *en papier Imperial* (Catalogue 1778): perhaps from the matrice of Francesco Zucchi (Maria Agnese Chiari Moretto Wiel,

a suite of the same after Giambattista Piazzetta,²⁰ four maps (the original Ughi plan,²¹ a reduced version of it,²² another map of Venice,²³ and a map of the Venetian Lagoon);²⁴ and five suites of topographical views (some completed, others underway, or merely planned). The publications in this last category are of a much higher class: only one was printed from old matrices,²⁵ the other four were commissioned by Furlanetto from Brustolon.

Prospectuum aedium

Jacopo Tintoretto e i suoi incisori, catalogue of an exhibition held in the Palazzo Ducale, Venice, [Milan] 1994, no. 70).

²⁰ *The Icones ad vivum expressae*, a suite of fifteen prints by Giovanni Cattini after paintings and drawings by Piazzetta, some of which were owned by the British consul in Venice, Joseph Smith. This suite had been first published in 1743 at the press of Giambattista Pasquali, then financed and operated by Smith, and after Smith's death (6 November 1770) Furlanetto had acquired the original matrices from his widow (Maria Agnese Chiari Moretto Wiel, *L'eredità di Piazzetta. Volti e figure nell'incisione del Settecento*, catalogue of an exhibition held in the Palazzo Ducale, Venice 1996, pp.40–55, nos. 68–83).

²¹ *Il Gran Piano Iconografico di Venezia in 13 fogli (Catalogo 1779)*: SCHULZ no. 117; CASSINI no. 72; ROMANELLI no. 72.

²² ...*Detta in due Fogli (Catalogo 1779)*: probably the map recorded in editions dated 1747 (SCHULZ no. 121, CASSINI

no. 86, ROMANELLI no. 77), 1787 (SCHULZ nos. 122–123, CASSINI no. 91), and 1797 (SCHULZ no. 124).

²³ ...*Detta in Elevazione in due Fogli (Catalogo 1779)*: probably the map (copied from Stefano Scolari's 1667 plan) described by SCHULZ no. 106 (as two sheets of 578 × 489 mm), CASSINI no. 85, ROMANELLI no. 85.

²⁴ *Nuova Pianta di Venezia con il circondario delle lagune, Isole, e sbocadure de Fiume non sogeta a scala, in No 4 Fogli Impariali (Catalogo 1779; not in Catalogue 1778)*: probably *Laguna Veneta | Mappa topografica | in cui a venti e misure dimostrasi il circondario della Lagu | na Veneta con tutte le addiacenti rispettive Valli in essa contenute | ... | Appresso Lodovico Furlanetto sul ponte dei Baretteri con Privilegio del Eccellentissimo Senato 1780*, described by ROMANELLI no. 89, CASSINI no. 89 (as 720 × 1365 mm, assembled).

²⁵ *No 38 Vedute nel giro del Canal Grande*, being impressions from the Canaletto-Visentini matrices, originally published in 1735 and 1742, obtained by Furlanetto from Consul Smith's widow together with other matrices (see note 20 above) and undistributed prints pulled from them. He first published the set in 1773, adding a deceptive publication line *Apud Ludovicum Furlanetto supra pontem vulgo dictum dei Baretteri ad insigne S.M. Gratiarum. C.P.E.S. MDCCCLXXIII*, when no such privilege had been granted; see Dario Succi, 'Elenco delle edizioni delle prospettive di Venezia' in *I rami di Visentini per le vedute di Venezia del Canaletto*, catalogue of an exhibition held in the Museo Correr, Venice, edited by Giulio Lari (Bergamo 1990); and Antonia Nessi, in *Une Venise de papier: La cité des Doges à l'époque de Canaletto et Tiepolo, chefs-d'œuvre d'une collection d'estampes vénitiennes du XVIII^e siècle*, catalogue of an exhibition in the Cabinet Cantonal des Estampes, Musée Jenisch, Vevey (Milan 2005), p.123 (the publication history is misunderstood by Antony Griffiths, in *Print Quarterly* 22, 2005, p.312).

The *Prospectuum aedium* was the first of the commissions Brustolon received from Furlanetto. It was conceived as a series of twelve prints after designs by Canaletto, and apparently was first issued as such in 1763, with the publisher falsely claiming to have obtained a privilege (a sort of copyright) from the Venetian Senate.²⁶ Furlanetto evidently judged it a success: he commanded Brustolon to etch additional views after Canaletto, and others after Marieschi and the Moretti brothers, projecting an enlarged work (never fully realised) of *24 Vedute principali di Venezia* (this title was bestowed upon the work in the aforementioned 'Catalogo delle Stampe' of circa 1779).

Furlanetto also engaged Brustolon on three other projects derived from drawings or paintings by Canaletto: a set of eight (later enlarged to twelve) prints of ceremonies and festivals attended by the Doge (the famous 'Feste dogali', commenced in 1766 but not certainly completed until 1779);²⁷ a set of *24 Capricj de Architettura* (described as a 'raccolta incominciata' in the 'Catalogo delle Stampe' of circa 1779, and perhaps abandoned, as no complete set is known);²⁸ and a set of *4 Principali note della Piasa*, copies of Visentini's four prints of St. Mark's Square, after Canaletto's paintings of 1743 and 1744 (in the same stock list, but probably not begun, as no impressions are known).²⁹

The frontispiece of the *Prospectuum aedium* is lettered 'Tomus primus | tabulas XII complectens', implying that further volumes composed of additional views were impending. On the evidence of a copy bound for the dedicatee, Doge Marco Foscarini, the first prints etched by Brustolon were the frontispiece, copies of eight prints in the Canaletto-Visentini *Prospectus Magni Canalis Venetiarum* (I: VI, VII, XI, XIII, XIV; II: 12; III: I, XI), and copies of three prints in Marieschi's *Magnificentiores selectioresque urbis Venetiarum prospectus* (nos. 5, 11, 16).³⁰ Thereafter, Brustolon copied two more of the Canaletto-Visentini views

²⁶ SUCCI 1986 pp.165–166.

²⁷ Eight prints were offered for sale by subscription in March 1766, although the first print was yet to be published; in May 1766 Furlanetto petitioned for the privilege of publishing a set of twelve prints and four had been produced by 6 August 1766. A subscription offer dated 1777 implies the set was still not complete (reproduced by MARINI p.100 fig.48). *Canaletto-Brustolon: Le feste duicali: Rami e stampe dalle collezioni del Museo Correr*, catalogue of an exhibition in Ca' Rezzonico, Museo del Settecento Veneziano, Venice, 21 April–6 November 2006, edited by Filippo Pedrocchi and Camillo Tonini (Venice 2006).

²⁸ Impressions are located by SUCCI 1983 p.83, note 5.

²⁹ For the originals, see SUCCI 1986 pp.151–153, 163–164 and nos. 80–83; CONSTABLE-LINKS p.668: 'No examples of Brustoloni's versions have been found'.

³⁰ Sotheby's, 'Continental books and manuscripts', London, 5 December 1996, lot 5 (consigned as 'The Property of the Gutzwiller Collection' and sold for £31,050). The volume contained the frontispiece and eleven views struck on various papers, including one having as its watermark a large coat of

(II: 8, 11) and one of Marieschi's (no. 4). He also made eight original etchings, deriving five from recent works by Canaletto and three from works ascribed to Giambattista and Giuseppe Moretti.³¹ This full complement of twenty-two views is only found however in copies assembled *circa* 1778 and thereafter in which the prints are in second state.³²

Consul Joseph Smith: promoter of the edition?

Legends on the frontispiece indicate that it was etched by Brustolon after a drawing by the painter-etcher-architect Antonio Visentini (1688–1782), who for fifty years had been

arms emblazoned by a shooting star, 265 × 120 mm, and countermark *OLANDA* (similar paper is used in our album for the extraneous print from the 'Feste dogali' suite).

Without identifying her authority, Borroni states 'La serie, nata in dodici tavole (6 dal Canaletto, 3 da G.B. Moretti, e 3 senza nome) oltre il frontespizio' (BORRONI p.726).

³¹ In his deposition appended to Furlanetto's petition for a blanket privilege, in 1779, Brustolon identifies only six of these original prints, those 'che raprentano [1:] Notti di S. Marta [2:] del Redentore [3:] di S. Giorgio [4:] di S. Pietro di Castello [5:] il Campo di S. Giacomo di Rialto [6:] il Ponte di Rialto verso l'Oriente etc.a' (GALLO pp.41–42). As Brustolon made two original etchings depicting '[5:] il Campo di S. Giacomo di Rialto', namely 'Prospectus Plateae ad Divum Iacobum de Rivoalto ubi Mercatores conveniunt' (after Canaletto) and 'Prospectus Plateae et Ecclesiae Sancti Jacobi prope Pontem Rivi alti' (after Moretti), one or the other is omitted from this list. The other print omitted from Brustolon's sworn deposition is 'Ecclesiae [sic] R.R.M.M. Ord. Servorum (vulgo Cappuccine) super ripam dictam Fondamente Nuove Prospectus litora versus', an original print after Canaletto (see note following).

³² In such copies, the frontispiece – still heralding twelve views – remains unaltered, and the views are numbered 1–22 (at lower right). The arrangement of the views seems arbitrary: the first prints to be etched – those present in the dedication copy (see above note 30) – are placed as numbers 1, 3–7, 14–15, 17–18, 21; the two views which appear in copies of the set assembled after *circa* 1778 are numbered 13 and 22. These prints (neither is present in our set) are

(a) The Rialto Bridge, etching and engraving (325 × 465 mm, according to Alpagò Novello) by Brustolon after Moretti, legends *Superba Moles Pontis Rivoalti ad Orientalem plagam | Jo. Bap. Moretti pinx. | Jo. Bap. Brustolon inc. | Apud Ludovicum Furlanetto supra Pontem vulgo dictum dei Baretteri C.P.E.S. ALPAGO NOVELLO p.565 no. [viii]; CONSTABLE-LINKS p.674 no. 13.*

(b) The Fondamenta Nuove and Sta Maria del Pianto, etching and engraving (326 × 467 mm, according to Alpagò Novello) by Brustolon after Canaletto, legends *Ecclesiae [sic] R.R.M.M. Ord. Servorum (vulgo Cappuccine) super ripam dictam Fondamente Nuove Prospectus litora versus | Antonius Canal Pinxit. | Jo. Bap. Brustolon inc. | Apud Ludovicum Furlanetto supra Pontem vulgo dictum dei Baretteri C.P.E.S. ALPAGO NOVELLO p.566 no. [xiv]; CONSTABLE-LINKS p.674 no. 22.* For the original, see CONSTABLE-LINKS no. 321 (compare p.210 no. 54*).

An intermediate stage of publication may be documented by the aforementioned Furlanetto stocklist of *circa* 1778 (see above note 14), where twenty-one views and the frontispiece are enumerated (no. 22 depicting 'The Fondamenta Nuove and Sta Maria del Pianto' is not yet listed).

working more or less exclusively for the British consul in Venice, Joseph Smith (1682–1770), and was thoroughly involved in Smith's publishing activities. Visentini had etched the set of fourteen prints after paintings by Canaletto which Smith had privately published, in 1735, as *Prospectus Magni Canalis Venetiarum*; and also the twenty-four prints added to the set, in 1742, for the new edition issued by the Smith-Pasquali partnership. The drawing which Brustolon copied for the frontispiece of the *Prospectuum aedium* is in the late Baroque-quasi Rococo style practised by Visentini at the end of the 1740s,³³ and probably was chosen for its resemblance to the frontispiece of the Canaletto-Visentini publication. Smith possessed many hundreds of Visentini's drawings (a large quantity was sold to George III in 1762 and is now divided between Windsor and the British Library) and it is tempting to speculate that he supplied this one to Furlanetto.

Since 1730, Smith had acted as Canaletto's chief patron and agent in Venice, purveying his work to English visitors and, by means of the *Prospectus Magni Canalis Venetiarum* – engravings of paintings Smith either held in stock, or could supply in other versions – to potential clients unable to see the originals for themselves. All the views in the 1735 edition were owned by Smith, and that publication is rightly considered as a catalogue of his wares. In the enlarged, second edition of 1742, only some of the views added to the series were owned by Smith, and the originals of most of these had been sold before publication. The 1742 edition thus appears to have been issued mainly for the benefit of Canaletto, who owing to political instability in Europe and the consequent decline in tourism was obtaining very few commissions in Venice (he shortly would try his luck in England). The unchanged reprint of 1751 likewise may be seen as an attempt by Smith to boost Canaletto's career, after the disappointment the latter received in London.

By the early 1760s, Smith's deepening financial troubles permitted him to acquire very little of Canaletto's work (from 1756–1757 only drawings, and nothing after 1762).³⁴ In March 1760, he was compelled to terminate his long-standing support of the Pasquali press,³⁵ and it became impossible for him either to advertise his wares or to promote Canaletto in his former way. Did Smith then begin to use Furlanetto for these purposes?

If the *Prospectuum aedium* was indeed presented to Doge Foscarini during his brief tenure (elected 31 May 1762; died 31 March 1763), then Brustolon must have set to work on the

³³ It is close to the title-print of the *Raccolta di vari Schizzi de ornati di celebre Autore nobilmente perfezionati, accresciuti, et intagliati da Antonio Visentini Veneto* (Venice 1747); see SUCCI 1986 no. 84.

³⁴ CONSTABLE-LINKS p.26.

³⁵ Federico Montecuccoli degli Erri, 'Il console Smith: Notizie e documenti' in *Ateneo Veneto*, new series, 33 (1995), p.125.

initial group of twelve plates in 1761, or early 1762 at the latest. In the earlier year Smith had commenced negotiations for the sale of his collections to George III (agreement was reached in May 1762 and first payment obtained 17 March 1763).³⁶ It may be no coincidence that of the small selection of prints copied by Brustolon from the *Prospectus Magni Canalis Venetiarum* (ten of its thirty-eight views), the original paintings of no fewer than six were hanging at this time in Smith's palazzo on the Canal Grande,³⁷ and the original (the only known autograph version) of another print quite possibly was there also.³⁸

The early provenance of the multiple versions of the three remaining pictures is incomplete. The presumed originals of two prints (a pair) are believed to have been sold by Smith in the 1730s to the 4th Duke of Leeds;³⁹ however versions corresponding with the Visentini prints exist, and it could be that Smith held in his 'stock' a pair of these (in the posthumous sale of Smith's possessions by Christie's in 1776, no less than sixteen Venetian *vedute* by Canaletto were offered, mostly pairs, all imprecisely described).⁴⁰ The original of the last print can not be decided among the numerous versions known,⁴¹ but it too is likely to have been hanging in Smith's palazzo. The *Prospectuum aedium* thus has the appearance of another 'catalogue' of Smith's stock. If Smith did not in fact underwrite its publication, it certainly was an opportune advertisement of his taste.

Since Smith had not bothered to protect his copyright in the *Prospectus Magni Canalis Venetiarum*, Furlanetto could freely publish copies of Visentini's prints. Marieschi's images were likewise unprotected, as the original privilege (granted for ten years) had since expired. Thus with little effort Furlanetto might have produced a suite of replica views destined for the tourist market, and indeed a mundane publication of that sort would have conformed with his others. Furlanetto – or a silent promoter of his publication – clearly had higher ambitions: a work equal in stature with the Canaletto-Visentini views, dedicated –

³⁶ VIVIAN p.35.

³⁷ These paintings, now at Windsor, are CONSTABLE-LINKS nos. 161, 236, 258, 347, 335, 308 (respectively *Prospectus Magni Canalis Venetiarum* I, VI, VII, XI, XIII, XIV; III, I).

³⁸ CONSTABLE-LINKS no. 23; *Prospectus Magni Canalis Venetiarum* III, XI. This picture is one of eight painted by Canaletto in the 1730s and sold by Smith to the Earls Fitzwilliam at uncertain dates (CONSTABLE-LINKS p.190: 'Nothing is known as to when they came to Milton Park'). William Wentworth, 2nd Earl Fitzwilliam (1748–1833) is recorded in Venice only in 1767 (INGAMELLS pp.360–361), so it conceivable that this picture was still in Smith's palazzo in 1763.

³⁹ CONSTABLE-LINKS nos. 95, 113; *Prospectus Magni Canalis Venetiarum* II, 11, 12. Thomas Osborne, 4th Duke of Leeds (1713–1789) is recorded in Venice in March–April 1734 and his heir in 1771 (INGAMELLS pp.593, 182–183). Eleven Canaletto's (including these two) were sold by the family in 1920; as a group, they 'do not look as if they had been painted as a single commission', but bought at different times (Joseph G. Links, *Canaletto and his patrons*, London 1977, p.44).

⁴¹ CONSTABLE-LINKS no. 228; *Prospectus Magni Canalis Venetiarum* II, 8.

like the published views of Carlevarij – to the then-reigning Doge. Brustolon was commissioned to make larger versions of the Canaletto-Visentini views, not mere copies; later he was asked for five prints after works by Canaletto never before engraved, and another three original prints after works by Canaletto's imitators, the Moretti brothers. Only Brustolon's four prints after Marieschi were routine copies and it is notable that the legends on these plates do not identify their designer.

In his two series of etchings reproducing Canaletto's drawings of the 'Feste dogali' and Roman views, Brustolon is a faithful copyist, following his exemplars in almost every detail.⁴² His versions of the ten Canaletto-Visentini *vedute* are anomalous: here Brustolon alters the proportions of his models, and fills the additional space with imaginary extensions of Canaletto's architecture and objects, and new objects and figures.

In 'Pons Rivoalti ad Occidentem', for example, Brustolon introduces into water which Canaletto left vacant a laden barge (left), an almost complete new gondola (centre), and the prow of another gondola (right); in 'Bucentaurus et Nundinae Venetae in die Ascensionis', he adds more of the Zecca (left), more of the buildings on the Riva degli Schiavoni (right), and inserts the prows of two boats (left); in 'Certamen nauticum', his additions include two figures lounging on the festival *macchina* (left) and two boats transporting eight figures (foreground); and in 'Qua Late patet S. Marci area major S. Jeminiani templum versus' he shows more of the base of the Campanile (left), more of the canvas-covered booth for a stall-holder (right), and inserts a pair of figures (centre) and single figure selling from a basket (right). The other six prints depending from Canaletto-Visentini *vedute* are similarly enhanced. Although these new objects and figures conceivably were Brustolon's own inventions, it is more likely he either was supplied with drawings to copy – the finger of suspicion points toward Smith, who had collected drawings by Canaletto related to the paintings sold by him⁴³ – or was helped by one of Canaletto's studio assistants.

The five etchings Brustolon made after recent works by Canaletto lend credence to the conjecture that the *Prospectuum aedium* was instigated by Smith to revive Canaletto's career. After Canaletto's return from England, in late 1755 or early 1756, his most important commission was for four paintings from Sigismund Streit, a German merchant resident in Venice. The dates of execution of the four paintings are uncertain; however in 1763 all were sent by Streit to his old school 'Zum Grauen Kloster' in Berlin. Brustolon etched three of the views painted by Canaletto for Streit: 'Festival on the Eve of Sta Marta', its

⁴² On the accuracy of Brustolon's transcriptions of these drawings, see CONSTABLE-LINKS nos. 630–639, 713; F.J.B. Watson, 'Notes on Canaletto and his engravers' in *The Burlington Magazine* 92 (1950), p.292.

⁴³ Joseph G. Links, *A supplement to W.G. Constable's Canaletto* (London 1998), p.12, note 121.

Fig. 1 Regatta on the Grand Canal, etching and engraving by Brustolon after an etching by Visentini (325 × 465 mm, platemark)

Fig. 2 Festa del Redentore, etching and engraving by Brustolon after Canaletto (320 × 447 mm, platemark)

pendant ‘Night Festival at S. Pietro in Castello’, and ‘Campo di Rialto’.⁴⁴ The legends on the latter two prints indicate that they were etched from intermediary drawings prepared by Giambattista and Giuseppe Moretti (on both, however, Brustolon omits mention of Canaletto’s authorship).⁴⁵

Another etching depicts ‘The Procession to the Redentore over the bridge of boats’. Although inscribed *Antonius Canal pinxit*, the term *pinxit* should not be literally construed: the print in fact relates to a small drawing of *circa* 1756–1760 in one of Canaletto’s sketch-books (the Algarotti-Corniani-Viggiano album, sheet 11).⁴⁶ No intermediary draughtsman is named on the print. The fifth etching – found in sets of the prints assembled *circa* 1778 and thereafter – reproduces ‘The Fondamenta Nuove and Sta Maria del Pianto’, one of Canaletto’s last view paintings of Venice, probably executed *circa* 1763.⁴⁷

Three of Brustolon’s original prints are not associated with known works by Canaletto. One is a moonlit view of the ‘Procession of the Doge to the island of S. Giorgio on Christmas Night’; another depicts in daylight ‘S. Giacomo di Rialto seen from the Campo di Rialto’. These views are credited in legends on the prints to Giambattista and Giuseppe Moretti, with Brustolon using in the latter case (probably inexactly) the term *pinxit*. A third etching – found in sets of the prints assembled *circa* 1778 and thereafter – reproduces ‘The Rialto Bridge from the South’ and is inscribed *Jo. Bap. Moretti pinx.*⁴⁸

The problems of Canaletto’s school and studio practice remain for the most part unsolved. Giambattista and Giuseppe Moretti both imitated Canaletto’s manner with consummate skill, however despite the persuasive evidence of these prints, it is not known whether either or both worked as his studio assistants. Giambattista appears in the register of Venetian painters (‘Fraglie dei Pittori’) in 1732–1744; in 1748 he reputedly painted the curtain for the Teatro S. Samuele; in the 1750s he produced designs for book illustrations; and he later made drawings for printmakers, including copies of *vedute* by Francesco Tironi (etched by Antonio Sandi and published by Furlanetto).⁴⁹ The younger Giuseppe was a decorative and theatrical scene painter also, teaching as well as practising (Pietro Gonzaga

and Fyodor Alekseyev are among those he is said to have instructed). He was elected to the Accademia Veneziana di Pittura e Scultore in 1772, presenting as his reception piece a ‘Capriccio with the Library’.⁵⁰ Most probably Giuseppe is the *I. Moretti* who drew in 1782 for the engraver Antonio Baratti a nocturnal view of the arena of the Piazza S. Marco decorated for a visit by the Conti del Nord.⁵¹

Publication history of the *Prospectuum aedium*

Each print of the *Prospectuum aedium* is known in four states: the first state is before numeration of the matrices by Furlanetto (all the prints in the present album are in this state), the second state *circa* 1778 is after Furlanetto’s numeration (1–22, at lower right), the third state *circa* 1791 carries the publication line *Apud Theodorum Viero in Via Mercatoria vulgo dicta dell’orologio C.P.E.S* and has the plates reorganised and renumbered (lower left),⁵² and the fourth state has a new publication line *Presso G.[iuseppe] Battaglia in Venezia* and is dated 1830. An impression of ‘Pons Rivoalti ad Occidentem’ with altered caption *Antonius Canal Pinxit. P.V.* may indicate the existence of yet another state.⁵³

The earliest issue of the *Prospectuum aedium* is represented by the aforementioned dedication copy containing the frontispiece and eleven prints, bound in red morocco with arms of Doge Marco Foscarini on covers. As no other copy with same contents is known,⁵⁴ it may

⁵⁰ Reproduced by LINKS 1977 fig.139.

⁵¹ SUCCI 1983 no. 10.

⁵² Three prints from Viero’s edition are reproduced in PELLEGRINI pp.62–69 nos. 21–23; and two others in SUCCI 1986 figs.121–122 (latter from ● Rome, Biblioteca Apostolica Vaticana, Gabinetto delle Stampe, shelfmark Cicognara XI. 3978, nos. 56–57, 59, 60, 65–66, 68, 72–73, 75–79: apparently a group of fourteen views only).

⁵³ LINKS 1967 pp.405–407, fig.29.

⁵⁴ Some copies containing fewer than twenty views are recorded; however it is doubtful that any represents a specific issue:

- Blois (Loir-et-Cher), Bibliothèque Abbé Grégoire, T210: library OPAC describes binding as ‘Cartonné, mauvais état’.

- Lawrence, KS, University of Kansas, Spencer Library, H176: library OPAC reports ‘only engr. t.-p. and 19 plates: 10 engr. by Brustolon after Canal, 4 engr. by Brustolon after Jo. Bap. Moretti et filii, 5 engr. by Brustolon’ (no description of binding).

- London, British Library, Maps, K.Top.78.65.f.: frontispiece and nineteen views only (‘Dextrorsum Theresianum sinistrorsum S. Simeon Parvus atq: Fullonium’ in duplicate). In the reorganisation of the King George III Topographical Collection, the prints were tipped onto guards in a modern album.

- Manchester, University, John Rylands Library, 22748: title in library OPAC emended ‘...adjectis tomus I. tabulas XII. [xv]’ suggesting fifteen plates are present (no description of binding).

⁴⁴ CONSTABLE-LINKS nos. 359–360, 282 (for dating, see pp.307–308 no. 342); Erich Schleier, in BETTAGNO pp.79–87; Katharine Baetjer and Joseph G. Links, *Canaletto*, catalogue of an exhibition held at the Metropolitan Museum of Art (New York 1989), pp.269–273.

⁴⁵ One of these two drawings may be CONSTABLE-LINKS no. 282[c].

⁴⁶ CONSTABLE-LINKS no. 644 and pp.641–642 (for dating see p.308).

⁴⁷ See above notes 31 and 32.

⁴⁸ See above note 32.

⁴⁹ Two of his drawings are reproduced by Veronika Birke, *Die italienischen Zeichnungen der Albertina. Generalverzeichnis* (Vienna 1994), nos. 1848–1849.

be supposed that Brustolon completed additional plates almost immediately, enabling Furlanetto to soon offer copies containing the (unaltered) frontispiece and twenty views. One such copy in a contemporary binding is known to us.⁵⁵

In 1766 Furlanetto obtained a privilege for publishing the series of prints of the ‘Feste dogali’ and by August 1768 four prints had been completed. The next issues of the *Prospectuum aedium* contain the frontispiece and twenty plates bound together with varying numbers of the ‘Feste dogali’ prints, ultimately with all twelve prints (the last of these was not certainly completed until *circa* 1777–1779).⁵⁶

● St. Petersburg, State Hermitage Museum: contents and binding uncertain. Impressions are reproduced in ‘Venice and Venetian Life in 18th Century Prints’ (translation of Russian title), catalogue of an exhibition May 2004–September 2004 (St. Petersburg 2004), pp.120–131, nos. 57–62.

● Rome, American Academy, 808.2.Ven.Bru: contents and binding uncertain.

● Unlocated: Leonardo Lapicciarella, *Libri illustrati veneziani del XVIII secolo. Disegni, Incisioni, Legature. Catalogo 3* (Florence [1957]), no. 7 (price Lire 220,000): frontispiece and fifteen views, ‘legatura moderna in mezzo vitellino’.

⁵⁵ ● Cambridge, MA, Harvard University, Houghton Library, Department of Printing & Graphic Arts, Typ 725.63 226: title and twenty views, bound in contemporary half-calf and marbled boards.

Copies with same contents, but probably without evidential value include:

● Berlin, Staatsbibliothek zu Berlin Preußischer Kulturbesitz, gr.2° Rp 7666 (‘Bestand erfragen / Kriegsverlust möglich’). Entered in the *Katalog der Ornamentstichsammlung der Staatlichen Kunstbibliothek, Berlin* (1939), no. 2713 (as twenty plates).

● Christie’s, ‘The Giannalisa Feltrinelli Library’, London, 3 December 1997, lot 255 (sold £12,650): frontispiece and twenty plates, bound in modern paper wrappers.

⁵⁶ ● Marlborough Rare Books Ltd., ‘Catalogue 47: Some recent acquisitions showing the development of Illustration and Design’, London 1962, item 32 (£390). The same or another copy with identical contents was offered by Sotheby’s, ‘Illustrated books and volumes of prints, mostly of the eighteenth-century. The property of a Gentleman [*i.e.*, A.R.A. Hobson]’, London, 10 November 1975, lot 27 (sold £3500): frontispiece and twenty views, plus five plates from of ducal ceremonies, in an English binding of Russia leather.

● Franco Semenzato & C. Sas, ‘Libri d’arte, libri antichi, incisioni’, Venice, 20 September 1986, lot 735 (result unknown): frontispiece and twenty plates, plus twelve plates of ducal ceremonies, in a contemporary half-calf binding, exlibris of Sir Thomas Philip Earl de Grey (1781–1859). The same or another copy with identical contents was offered in Semenzato’s sale ‘Eccezionali libri figurati del XVI al XIX secolo’, Venice, 9 June 1987, lot 68 (result unknown). It reappeared in Galerie Kornfeld, Auktion 245, Bern, 10 June 2009, lot 16.

● Nicolas Rauch S.A., ‘Architecture, ornements, décoration intérieure, recueils de vues. Bibliothèque Edmond Fatio’, Geneva, 23 November 1953, lot 36 (estimate CHF 800/1000): an album of thirty-six prints bound in ‘demi-bas ancienne’, the contents twenty-two prints of the *Prospectuum aedium* (frontispiece, eleven prints after Canaletto, five after Moretti, and five not signed); twelve prints of ducal ceremonies; an Ughi map; and portrait of Doge Mocenigo. Resold by Christie’s, ‘Valuable printed books and manuscripts’, London, 9 December 1983, lot 18 (£10,000).

The ‘Feste dogali’ prints were struck by Furlanetto in two states (the first before numbers and the second after numeration of the prints 1–12, which presumably was undertaken when all twelve matrices had been completed). The album here offered for sale contains print no. 1 of the ‘Feste dogali’ suite and most probably was assembled in the late 1760s or early 1770s, just before Furlanetto added the two additional views to the set.⁵⁷ The succeeding issues presumably are those which offer either the twenty-one views (as advertised in the aforementioned stocklist of *circa* 1778)⁵⁸ or the full complement of twenty-two views.

In the 1780s Furlanetto began publication of *Ventiquattro prospettive delle Isola della Laguna di Venezia*, a suite of etchings by Antonio Sandi after Francesco Tironi. The succeeding issues contain the prints of the *Prospectuum aedium* in their second (numbered) state, bound with varying numbers of Sandi’s prints (seven were completed by 1782,⁵⁹ and the rest by about 1785),⁶⁰ and sometimes with other Furlanetto publications as well.⁶¹
