

Frontispiece engraved by Silvester Pomarede after a drawing by the Ravenna painter Andrea Barbiani (220 x 150 mm platemark)

Ginanni, Giuseppe

Ravenna 1692 – 1753 Ravenna

Delle uova e dei nidi degli uccelli. Libro primo [all published]. Aggiunte in fine alcune Osservazioni, con una Dissertazione sopra varie spezie di Cavallette.

Venice, Antonio Bortoli, 1737

QUARTO, (100)ff. signed A-Z⁴ Aa-Bb⁴ (blank Bb4) and paginated (10) 1–130, (2) 1–55 (3), with engraved frontispiece (included in the registration), three engraved sub-titles, twenty-two plates (of eggs), and eight plates of grasshoppers, by Silvester Pomarede after designs of Andrea Barbiani.

PROVENANCE Sotheby's, 'Books and Maps', London, 30 October 1989, lot 592 — Private Collection, Amsterdam

Wormtrack in margin of initial quire, otherwise in fine state of preservation.

BINDING contemporary Italian vellum.

FIRST EDITION of 'the first work to deal exclusively with birds' eggs and birds' nests' (Anker), illustrating the eggs of one hundred species, classified (following Aldrovandi's model) into three groups: predatory and non-predatory land birds, and aquatic birds, each with a brief account of the nest, breeding time, and physical features of the eggs. The appended treatise, 'Osservazioni giornali sopra le Cavallette', was the product of more than two years study, and features eight engraved plates of grasshoppers. The book earned for its author an international reputation.¹

Ginanni created on his property in Ravenna a garden rich in exotic plants, a library of books on natural history, and a 'piccolo Museo di cose naturali', containing many of the specimens here engraved.² The continuation promised on the title-page never

² The collection was bequeathed with a life interest to Giuseppe's two nephews and in perpetuity to his alma mater, the Jesuit Collegio dei Nobili di Ravenna; see Francesco Ginanni, *Produzioni naturali che si ritrovano nel Museo Ginanni in Ravenna, metodicamente disposte e con annotazioni illustrate* (Lucca 1762).

appeared, for the reason (published in the dedication of the author's *Opere postume* 1755) that 'non essendomi riuscito di fare altra sufficiente Raccolta di Uova d'Uccelli'.³

Many interesting details about the genesis of the work and its publication are embedded in correspondence between the author and the naturalist Giovanni Bianchi (Iano Planco, 1693–1775) of Rimini.⁴ The book was conceived in January 1735 as 'un piccolo tometto' with illustrations after drawings to be supplied by 'Sig. Andrea Barbiani [1708–1779] Pitore buono di Ravenna'. Initially, Ginanni considered Florentine and Venetian printmakers, but advised by a relative, he searched in Rome, and by the end of March 1735 had engaged there 'Silvestro Pomareda [fl. 1736–1768] Franzese'. The programme for the frontispiece was decided immediately,⁵ however work on the plates proceeded slowly: the first two matrices were completed in September 1735, and the last was delivered at the beginning of March 1736. Difficulties meanwhile had arisen about the licensing of the book and the place of printing was quickly shifted, from Rome to Venice.
