BINDING unbound sheets in a printed wrapper (dated 1852).

A COLLECTION OF TOPOGRAPHICAL VISTAS of Italian cities, drawn by the French painter, lithographer and architect Alfred Guesdon (1808–1867), author of similar works depicting French, Swiss and Spanish cities.¹ The present work was published serially and seems never to have been completed. The British Library copy contains additional printed text (paginated 41–84) and plates (numbered 32–42);² all other copies known to the writer contain fewer plates and less text: the one in the Bibliothèque nationale de France has forty plates and forty pages of text;³ the one in the National Art Library at the Victoria & Albert Museum has nineteen plates and no text.⁴

How Guesdon achieved his meticulously rendered aerial perspectives is exciting debate: one suggestion is that he used aerial photographs, taken by the English photographer Charles Clifford;⁵ another is that he employed a geometrical device.⁶

The views are often discussed and reproduced; see, for example
